Softmath announces Algebrator™ 3.0 Mathematics Software

Software helps solve and explain user-supplied Algebra problems

San Antonio, TX, May 8, 2007 – Softmath today announced availability of the newest version of its popular Algebrator™ software. Algebrator is a mathematics tutoring software program which actually solves algebraic problems entered by users of the program, while providing interactive explanations which foster algebra learning.

Algebrator 3.0 is a feature-rich product, complemented by an elegantly simple user interface. Areas of Algebra addressed by Algebrator:

- Simplification of algebraic expressions including operations with polynomials, exponential expressions, fractions and roots
- Factoring and expanding expressions
- Simplifying and rationalizing operations with complex numbers
- Solving linear, quadratic and many other types of equations
- Solving a system of two and three linear equations
- Graphing general functions and curves such as lines, parabolas, hyperbolas, circles, and ellipses
- Operations with functions such as composition, inverse, range, domain
- Simplifying logarithms
- Basic geometry and trigonometry
- Arithmetic and other pre-algebra topics such ratios, proportions and measurements

“Softmath is well known for our flagship Algebrator Math software,” stated Neven Jurkovic, President of Softmath. “We've designed Algebrator 3.0 to be the most comprehensive, user-friendly Algebra tutor and solutions program on the market and our users are telling us that we succeeded.”

Algebrator 3.0 is targeted at students from pre-algebra through college-level algebra. In addition to students, math teachers use Algebrator as a supplemental teaching tool in classrooms. Parents utilize the program to assist their children with their math assignments, as well as to provide a final check of their homework. It is also very useful for professionals that need to solve Algebra problems in the workplace, and are either not adept at math, or enjoy the productivity benefits provided by Algebrator. The software is shipping and available directly from the Softmath website at www.Softmath.com. Softmath is currently expanding its sales channels, and is recruiting qualified Retailers and Distributor Partners worldwide.

For more information on Algebrator 3.0 visit <http://www.Softmath.com> or contact the company at algebrator@softmath.com or (512) 788-5675.
